

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 **Claim 1 (original):** Filter system for a household
2 dishwasher comprising a wash space (11) and a liquid
3 circuit that comprises a course sieve (33) and one or
4 several fine filters (18, 19), the coarse sieve (33) being
5 movable between at least two positions with the aid of
6 actuating means (29, 31) arranged in the dishwasher
7 characterized in that a part of the circulating liquid in
8 the first position (Fig. 3) flows through a collecting part
9 (34) of the coarse sieve (33) whereas the circulating
10 liquid in the second position (Fig. 4) flows outside said
11 collecting part.

1 **Claim 2 (original):** Filter system according to claim
2 1 characterized in that the course sieve (33) is in the
3 first position during the main part of the cleaning phase
4 whereas the coarse sieve is in the second position during
5 the main part of the rinsing phase.

1 **Claim 3 (currently amended):** Filter system according
2 to ~~any of the previous claims~~claim 1 characterized in that
3 the collecting part (34) of the coarse sieve is cup shaped.

1 **Claim 4 (currently amended):** Filter sieve according to
2 ~~any of the previous claims~~claim 1 characterized in that
3 coarse sieve (33) is provided with a filtering area (37)
4 serving as a coarse sieve for the circulating liquid when
5 the coarse sieve is in its second position.

1 **Claim 5 (original):** Filter system according to claim
2 4 characterized in that the collecting part (34) of the
3 coarse sieve (33) is provided with a circular wall part and
4 a bottom (36) whereas the filtering area (37) area
5 constitutes an extension of the circular wall part below
6 said bottom (36).

1 **Claim 6 (currently amended):** Filter system according
2 to ~~any of the previous claims~~claim 1 characterized in that
3 said means (29, 31) are activated and/or deactivated by the
4 program control.

1 **Claim 7 (currently amended):** Filter system according
2 to ~~any of the previous claims~~claim 1 characterized in that
3 the bottom of the wash space (10) is provided with a liquid
4 collecting container (17) divided into a first and a second
5 chamber by means of [[a]] the fine filter (19), the first
6 chamber communicating with a circulation pump whereas the
7 second chamber is arranged to receive the coarse sieve

8 (33) .

Claim 8 (canceled)

1 **Claim 9 (currently amended):** Filter system according
2 to ~~any of the preceding claims~~claim 1 characterized in that
3 said actuating means is placed below the coarse sieve.

1 **Claim 10 (original):** Filter system according to claim
2 9 characterized in that said actuating means (29, 31) is a
3 so called wax actuator.
